PROFESSIONAL SUMMARY

IT Support Engineer with 3+ years of experience supporting Microsoft Windows environments, Microsoft 365, Active Directory, and enterprise IT infrastructure. Hands-on experience deploying and administering Windows Server 2022, Azure Virtual Machines, Active Directory Domain Services, Group Policy, WSUS, PowerShell automation, DNS, DHCP, and file services through a self-built enterprise lab environment.

Skilled at troubleshooting complex infrastructure issues, administering user identities, managing server environments, and delivering reliable technical support across desktop, server, and cloud technologies. Passionate about systems administration, cloud infrastructure, automation, and continuous professional development.

CORE TECHNICAL SKILLS

Cloud & Infrastructure

- Microsoft Azure
- Azure Virtual Machines
- Windows Server 2019/2022
- Active Directory Domain Services
- Microsoft 365 Administration
- Exchange Online
- DNS
- DHCP
- Group Policy
- WSUS

Systems Administration

- User & Group Administration
- File Server Administration
- NTFS & Share Permissions
- Remote Desktop Services

- Windows 10/11
- PowerShell
- Backup & Restore
- Server Maintenance

Networking

- TCP/IP
- DNS
- DHCP
- VPN
- Remote Connectivity
- Network Troubleshooting

Support & Operations

- SLA Management
- Incident Management
- Hardware Support
- Software Deployment
- Printer Support
- Technical Documentation
- Customer Support

PROFESSIONAL EXPERIENCE

Support Engineer

Alakhe Conglomerate — Reitz

2022 – Present

- Provide technical support and administration for Windows-based environments, user systems, and operational IT infrastructure.
- Support Microsoft 365 environments including Outlook, Teams, SharePoint, and user account administration.
- Perform Active Directory administration tasks including user creation, password resets, account maintenance, and permission assignments.
- Assist with server-related troubleshooting, infrastructure support, and operational system maintenance.

- Monitor and resolve hardware, software, printer, and connectivity-related incidents within SLA requirements.
- Troubleshoot DNS, DHCP, IP addressing, and remote connectivity issues across business environments.
- Support onboarding and offboarding processes including account provisioning, permissions management, and device configuration.
- Deliver remote technical support using remote desktop tools for offsite users and operational teams.
- Escalate complex technical and infrastructure-related incidents with detailed troubleshooting documentation.
- Contribute to IT operational documentation, support procedures, and knowledge base updates.
- Collaborate with technical teams to ensure system stability, operational continuity, and service availability.

First Line Support Consultant

Velocity — Bryanston

2025 – 2025

- Delivered technical support within a structured IT support environment supporting Windows systems and operational users.
- Assisted with hardware setup, software troubleshooting, and Windows operating system support.
- Supported user account administration and access-related support requests.
- Worked within ticket-driven workflows while maintaining response and resolution targets.
- Assisted senior IT personnel with troubleshooting and operational support activities.
- Maintained professional communication with users and third-party stakeholders during issue resolution.
- Gained exposure to structured IT operational processes and technical escalation procedures.

TECHNICAL EXPOSURE

- Exposure to Windows Server administration concepts and server support tasks
- Familiar with SQL database concepts including backups, restores, and basic SQL scripting
- Basic exposure to Linux environments and command-line administration
- Familiar with PowerShell scripting fundamentals and automation concepts
- Understanding of monitoring operational environments, services, and system performance

- Exposure to technical troubleshooting across hardware, software, networking, and infrastructure environments
- Experience supporting SMB environments ranging from 10–150 users
- Maintained personal lab environments for Windows Server, Active Directory, networking, and infrastructure learning

PROJECTS

Enterprise Azure Infrastructure Lab

Microsoft Azure | Windows Server 2022 | Active Directory | PowerShell

Designed, deployed and administered a complete enterprise Windows infrastructure hosted in Microsoft Azure to simulate a production corporate environment.

Project Highlights

- Designed an Azure virtual network hosting multiple Windows Server and Windows 10/11 virtual machines.
- Installed and promoted Windows Server 2022 as an Active Directory Domain Controller.
- Configured DNS services and domain authentication for enterprise identity management.
- Joined Windows 10 and additional Windows Server machines to the domain.
- Created an organizational unit (OU) structure representing multiple business departments.
- Created and managed Active Directory users, security groups and administrative permissions using PowerShell.
- Configured Group Policy Objects (GPOs) to enforce workstation security policies and Remote Desktop settings.
- Deployed a dedicated File Server with departmental shared folders.
- Implemented NTFS and Share permissions using security groups following least-privilege principles.
- Configured Remote Desktop access using Active Directory group membership and Group Policy.
- Installed and configured Windows Server Update Services (WSUS) for centralized Windows updates.
- Performed extensive troubleshooting involving DNS, Group Policy, Active Directory replication, Remote Desktop authorization, WSUS client reporting and file permissions.
- Documented deployment procedures and administrative tasks to simulate enterprise operational standards.

KEY ACHIEVEMENTS

- Consistently met response and resolution targets in high-volume support environments
- Successfully supported Microsoft 365 administration and user management tasks
- Recognised for calm, professional communication during high-pressure support incidents
- Assisted in maintaining stable operational IT services across multiple user environments
- Built strong troubleshooting and customer support capabilities within fast-paced IT environments

EDUCATION

Diploma in Information Technology Damelin
College — Braamfontein
2017 – 2020

CERTIFICATIONS & TRAINING

- Microsoft 365 Administrator (MS-102)
- Microsoft 365 Training & Administration Exposure
- Continuous self-study in Windows Server, Linux Administration, SQL, and PowerShell

ADDITIONAL INFORMATION

- Strong willingness to learn and adapt to new technologies
- Comfortable working within technical operations and infrastructure-focused teams
- Excellent written and verbal communication skills
- Strong attention to detail and problem-solving ability
- Team-oriented with the ability to work effectively under pressure
